

Neocate® Junior Formulas have been upgraded!

Transition Guide

The same hypoallergenic and nutritionally complete amino acid-based formulas you have come to know.

- ✓ Great new taste
- ✓ Updated macro- and micronutrient profile
- ✓ Easy 1:1 mixing (1 fl oz water: 1 scoop powder)

Easy to mix instructions

- All of the upgraded Neocate Junior (and Infant) products have easy 1:1 mixing
- Always follow the mixing instructions on the can for formula preparation and storage.
- Be sure to use the scoop that comes with the specific Neocate Junior can. The old scoop is **YELLOW** and the new scoop is **PINK**.
- Scoop sizes vary for each Neocate flavor and are not interchangeable.

Transitioning to the upgraded Neocate Junior

For most children, teens and adults, changing from one formula to an upgraded version will be simple and may not require a “transition period.” Remember, everyone will go at their own pace. The simple steps in the table below are a guide to fading.

Fading is a transition strategy where a small amount of something new is mixed with something familiar. This is achieved by gradually increasing the ratio of new to the old over time. The goal is the acceptance of the new combination, even if the difference is noticeable.

FADING STEPS

Before beginning the fading process, be sure to reconstitute each formula according to the mixing instructions on the can of each product. Once you’ve reconstituted both formulas, you can then mix the formulas together based on the suggested fading strategy below.

Note: Parents and caregivers needing assistance should ask their healthcare team if they need to transition gradually on to the upgraded Neocate Junior formulas.

STEPS	Previous formulation Neocate Junior	Fading Mixture	Upgraded formulation Neocate Junior
1	75% Example: 75% of 8 fl oz is 6 fl oz Use _____ fl oz		25% Example: 25% of 8 fl oz is 2 fl oz Use _____ fl oz
2	50% Use _____ fl oz		50% Use _____ fl oz
3	25% Use _____ fl oz		75% Use _____ fl oz
4	None		100% GOAL ACHIEVED Use _____ fl oz

Transition Tip

Research shows that it may take up to 20 exposures before adopting a new food. Keep trying and use these steps to help with your transitioning efforts.

When to seek help

If transitioning to the upgraded Neocate Junior formula seems difficult, talk to a member of your healthcare team. You may also call 1-800-NEOCATE (1-800-636-2283), Monday – Friday, 8:30am – 5:00pm ET to speak to a Nutrition Specialist.

Neocate[®] Junior Chocolate & Tropical now contain prebiotic fiber

What should I expect when transitioning to a formula without prebiotics to a formula with prebiotics?

Most individuals will experience no or minimal change when transitioning from a formula without prebiotics to a formula with prebiotics, however, some may experience a temporary period of gas and/or discomfort. It could take a short period to adjust and get used to the new formula. Parents and caregivers needing assistance should ask their healthcare team if they need to transition gradually on to the upgraded formula.

Anything else I should expect?

The same Neocate Junior flavors you have come to know, have now been upgraded and have a great, new taste. In addition to taste, some individuals may notice a difference in smell, color and texture of the upgraded formula compared to the previous versions. As always, if you need help with transition or have any additional questions, please call our Nutrition Specialist team at 1-800-NEOCATE (1-800-636-2283).
